

AMENDMENTS TO THE CLAIMS

Please amend the claims as follows:

1-27. (Canceled)

28. (Previously Amended) An article of manufacture comprising a panel having at least one adjustable assembly supporting the panel at least partially within a track supporting the panel in a frame, wherein the adjustable assembly comprises:

(a) a housing comprising a chamber having a first end and a second end, such that the first end is shaped for insertion into the panel and the second end comprises an aperture, and further comprising at least one guide for positioning the housing in the panel;

(b) an insert that fits into the aperture on the second end of the housing extending beyond the second end of the housing and the panel, wherein the insert comprises a surface that abuts the track and supports the panel in the track; and

(c) means for adjusting a position of the panel with respect to the track.

29. (Previously Amended) The article of manufacture of claim 28, wherein the panel comprises a window.

30. (Canceled)

31. (Previously Amended) The article of manufacture of claim 28, wherein the first end of the housing is positioned at a preset distance from the second end of the housing such that when the housing is inserted into the panel, the first end of the housing abuts at least a portion of the panel.

32. (Previously Amended) The article of manufacture of claim 28, wherein the positioning guide extends from an external surface of the housing to abut a portion of the panel.

33. (Original) The article of manufacture of claim 28, wherein the positioning guide comprises a flat planar surface that extends from the housing in a direction that is perpendicular to the length of the housing body.

34. (Previously Amended) The article of manufacture of claim 28, wherein the positioning guide exerts an outward force from the housing to impinge on at least a portion of the panel.

35. (Canceled)

36. (Original) The article of manufacture of claim 28, where the insert is cylindrical in shape.

37. (Previously Amended) The article of manufacture of claim 28, wherein the adjusting means comprises a threaded surface in the housing.

38. (Previously Amended) The article of manufacture of claim 37, wherein the adjusting means further comprises a threaded surface on the insert compatible with the threaded surface in the housing.

39-40. (Canceled)

41. (Previously Amended) The article of manufacture of claim 28, further comprising means for re-adjusting the position of the panel with respect to the track after the panel is installed in the track.
